PROFESSIONAL EXPERIENCE

SQA ENGINEER - Cloudstaff Modern Workforce Inc. July 2021 - Present

- Conduct comprehensive manual testing for new features and bug fixes across web and mobile applications.
- Perform regression, API, integration, and performance testing to ensure stable and reliable releases.
- Design, develop, and maintain automated test scripts using Selenium and Playwright.
- Integrate automated test suites into CI/CD pipelines to improve release confidence and reduce manual regression effort.
- Lead and implement automation testing initiatives within the team's development cycle.
- Collaborate closely with developers, product owners, and cross-functional teams in Agile/Scrum environments.
- Lead QA trainings and onboarding sessions for OJTs and new hires, improving ramp-up time and testing consistency.
- Work directly with executives to align QA strategies with business objectives and delivery timelines.
