EXPERIENCE
SQA ENGINEER

Cloudstaff Modern Workforce Inc. | July 2021 – Present

- Conduct manual testing for new features and bug fixes on web and mobile apps.
- Perform regression, performance, API, and integration testing.
- Develop and maintain automated test scripts; integrate into CI/CD pipelines.
- Collaborate with cross-functional teams.
- Led and implemented automation testing for the team's development cycle.
- Led trainings for OJTs and New Hires in our team.
- Work closely with the Australian CEO (PH-based) and other executives to align QA strategies with business objectives and deliver high-quality solutions.
